A biography of America's seventh president, ANDREW JACKSON: GOOD, EVIL AND THE PRESIDENCY explores whether Americans should celebrate Jackson or apologize for him. Viewers discover that Jackson fought in the Revolutionary War when he was 13 years old and that he used the skills learned in battle to kill a man over a gambling debt; that Jackson led the American army to the most surprising victory in its history in the Battle of New Orleans, but that he also launched an unauthorized invasion of Florida; that Jackson was the first great champion of the common white man and owned more than a hundred black Americans; that Jackson dramatically expanded the United States and did so by brutally wresting vast regions of the south from Native Americans; that Jackson, in one of the boldest political strokes in history, founded the Democratic Party, yet was viewed by his enemies as an American Napoleon. The film concludes with the words of Jackson's first biographer, James Parton: "Andrew Jackson was a patriot, and a traitor. He was the greatest of generals, and wholly ignorant of the art of war. He was the most candid of men, and capable of the profoundest dissimulation. He was a democratic autocrat, an urbane savage, an atrocious saint." Martin Sheen narrates.

"When they passed out talent," Broadway star Carol Channing says of composer and lyricist Jerry Herman, "Jerry stood in line twice." Herman wrote the words and music for some of the greatest Broadway musicals ever mounted, including "Hello, Dolly!," "Mame" and "La Cage aux Folles." "Words and Music by Jerry Herman" uses insightful on-camera interviews, behind-the-scenes rehearsal sessions, rare photographs and never-before-seen archival footage of original Broadway performances to create a warm, humorous and moving portrait of a living theater legend. Five years in the making, this documentary by award-winning filmmaker Amber Edwards chronicles Herman's rapid rise from witty, topical off-Broadway revues during the 1950s to his first Broadway hits in the 1960s ("Milk and Honey," followed quickly by the record-breaking "Dolly" and then "Mame") through the less successful shows of the 1970s ("Dear World," "Mack & Mabel" and "The Grand Tour") to his triumphant return in 1983 with "La Cage aux Folles," which made social and political history.

Ten years ago, stimulants like Ritalin and Adderall were the drugs of choice to treat behavioral issues in children. Today children as young as four years old are being prescribed more powerful anti-psychotic medications that are much less understood. The drugs can cause serious side effects, and virtually nothing is known about their long-term impact. The increase in the use of anti-psychotics is directly tied to the rising incidence of one particular diagnosis - bipolar disorder. Experts estimate that the number of kids with the diagnosis is now more than a million and rising. As the debate over medicating children continues to grow, FRONTLINE producer Marcela Gaviria confronts psychiatrists, researchers and big pharma about the risks and benefits of prescription drugs for troubled children.
